

A Decade of Efficiency in Nova Scotia

Nova Scotians have reached an impressive milestone – **10 years of savings** from energy efficiency programs and services!

Together, look how far we've come.

Fighting climate change by avoiding over

1 million tonnes

of CO₂e annually.

the same amount of CO₂e emitted from

1,000,000,000
lbs of coal

Reduced electricity use by **12%**

Energy efficiency has contributed

25%

of Nova Scotia's overall GHG emission reductions since 2011

Nova Scotians are saving more than

\$1.4 billion in energy costs

Helping low income homeowners and tenants save

\$263 million on their energy bills

Over 370
local businesses

are part of our
Efficiency Trade
Network

To date,
we've upgraded
over 200
Mi'kmaq homes
with energy efficient upgrades
like insulation, heat pumps
and draft proofing

We engage
over **25,000**
students
across Nova Scotia
every school year

We've visited over
500 communities

We've helped
Nova Scotians
buy or install over
7 million
energy efficient
products

We've worked with
1 out of 3
businesses in Nova Scotia,

including over 13,000
small businesses
